STRUCTURE OF SOUTH AFRICAN IMPORTS

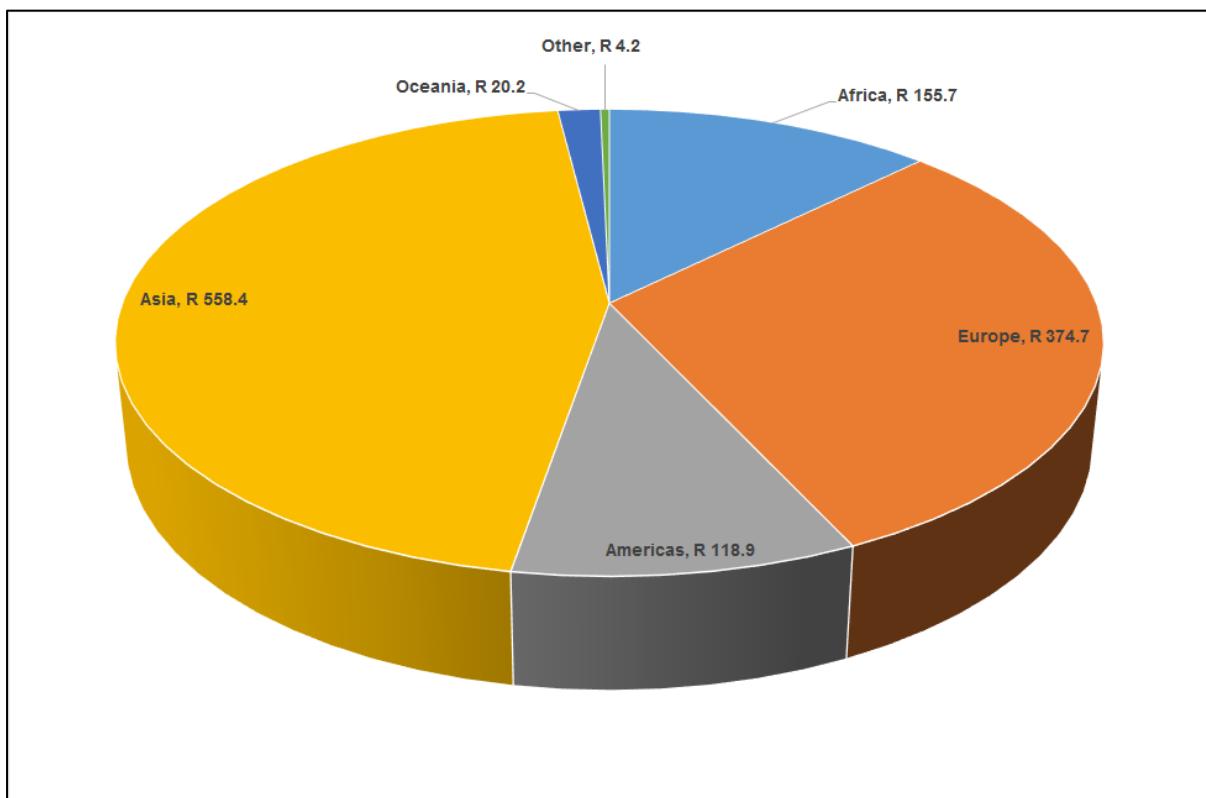

The pattern of South Africa's foreign trade has changed dramatically in recent years. Asia is now the country's largest trading bloc by far and accounted for 31,5% of total exports and 45,3% of total imports in 2018. Europe accounted for 30,4% of South Africa's total imports in 2018 and the Americas for 9,7%. With regards to Africa, South Africa retains a two to one trade surplus with the rest of the continent.

Total imports from regions – South Africa, including BLNS – 2014-2018

World Region	Imports 2014 (R bil)	Imports 2015 (R bil)	Imports 2016 (R bil)	Imports 2017 (R bil)	Imports 2018 (R bil)
Africa	145.7	118.6	120.1	115.8	155.7
Europe	319.1	340.6	359.5	359.5	374.7
Americas	109.6	120.7	127.5	117.6	118.9
Asia	493.0	491.4	477.0	495.3	558.4
Oceania	14.2	14.7	13.4	15.8	20.2
Other	1.9	1.9	1.9	2.8	4.2
Total	1 083.4	1 088.0	1 099.3	1 106.9	1 232.1

South Africa is a member of the 164-member World Trade Organisation (WTO). As an export-oriented economy South Africa is very open to international trade and continues to seek beneficial trade agreements with individual countries and trading blocs. South Africa's trade negotiations are being conducted alongside the country's partners in the Southern African Customs Union (SACU), comprising Botswana, Lesotho, Namibia and Swaziland (renamed eSwatini), following the renewed SACU Agreement in 2004 that requires SACU to negotiate all trade agreements as a bloc.

SACU, at present, enjoys free trade agreements (FTAs) with the 28-country European Union and the European Free Trade Association (EFTA) comprising Iceland, Lichtenstein, Norway and Switzerland. SACU is also part of the 15-country Southern African Development Community (SADC) free trade area, has a preferential trade agreement (PTA) with Mercosur, comprising Argentina, Brazil, Paraguay, Uruguay and Venezuela, while South Africa also enjoys duty-free and quota-free entry into the US market under the African Growth and Opportunity Act (AGOA), a unilateral trade preference programme. The country is currently also negotiating a preferential trade agreement with India.

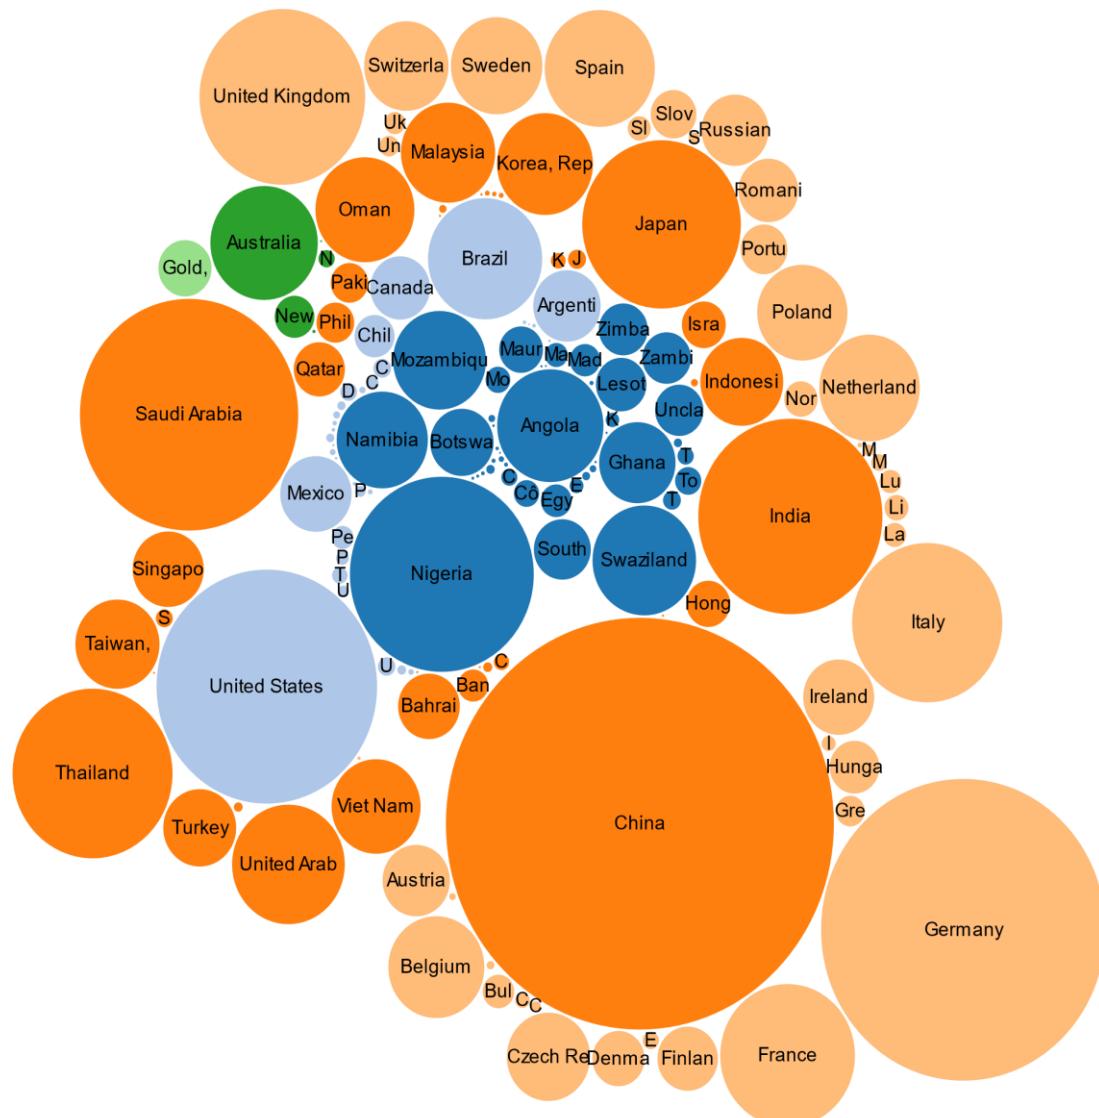

Top South African import regions – 2018 (R billion)

Source: SARS

South Africa's established trade relations with the Eurozone and NAFTA remain important as they are long-standing relationships. However, in recent years, trade ties with Africa and Asia have strengthened. This is clearly evident in South Africa's countries of origin for its import requirements. The size of the following circles represents the countries' contribution to total South African imports and the colour of the circles represent the world region groups. China remained South Africa's biggest country trade partner in 2018, with imports amounting to R226,5 billion, or 18,4% of total imports of R1 232,1 billion, followed by Germany (9,9%), the US (5,9%), Saudi Arabia (5,8%), India (4,1%) and the UK (3,4%).

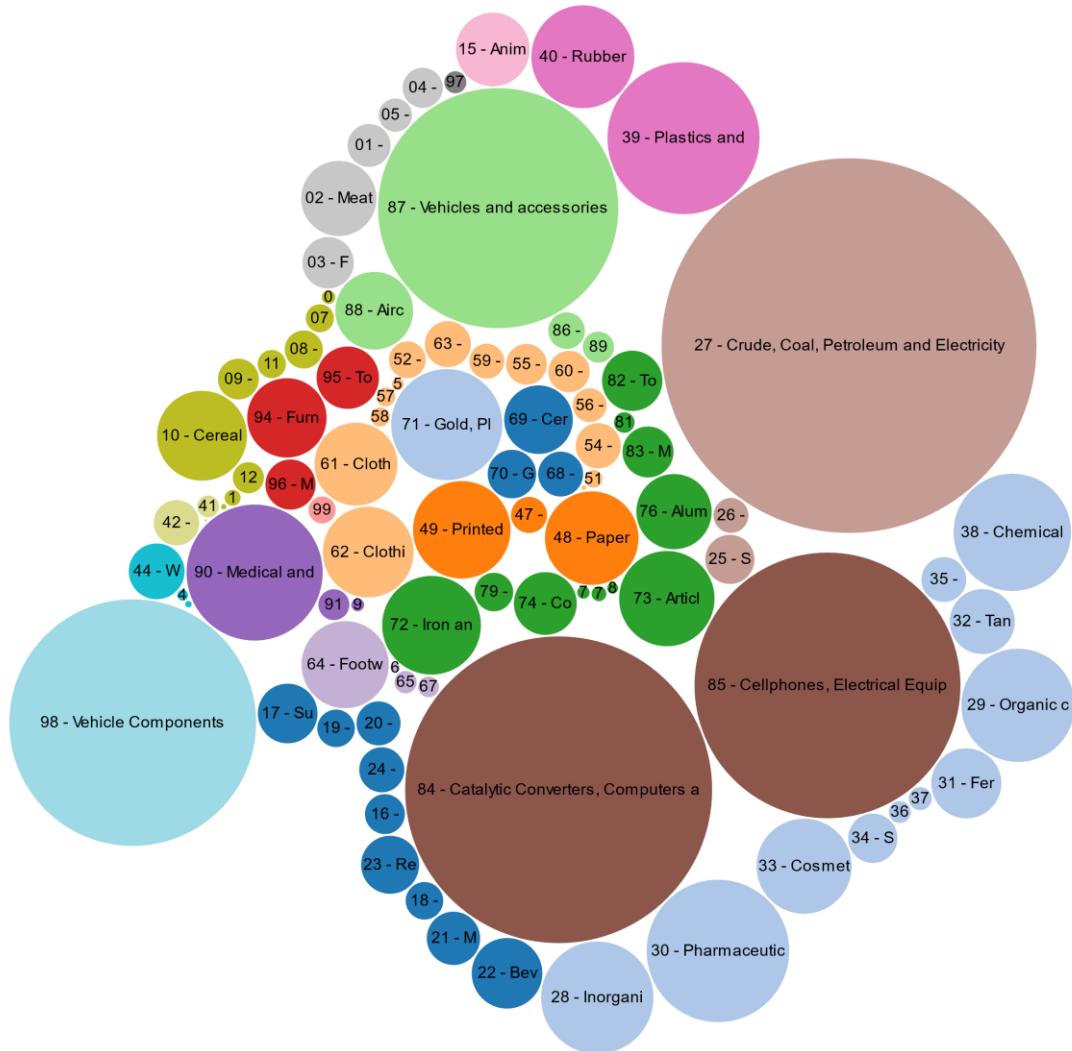

Top South African countries of origin for imports – 2018

Source: SARS

With regards to commodities imported, South Africa's main imports in 2018 were crude oil and refined petroleum oils; machinery, including computers; electrical machinery equipment, including cell phones; vehicles and accessories; and vehicle components. Saudi Arabia and Nigeria remain two of South Africa's biggest crude oil suppliers. Machinery and transportation equipment continue to make up more than one-third of the value of South Africa's imports in 2018. The bulk of the manufactured goods and machinery and equipment imported came from China while a large portion of components for vehicles being manufactured in South Africa was imported from Germany. The size of the circles in the following graph represents the Harmonised Customs System chapter contribution while the colour of the circles represent the chapter sub-section groups.

IMPORTS OF VEHICLES

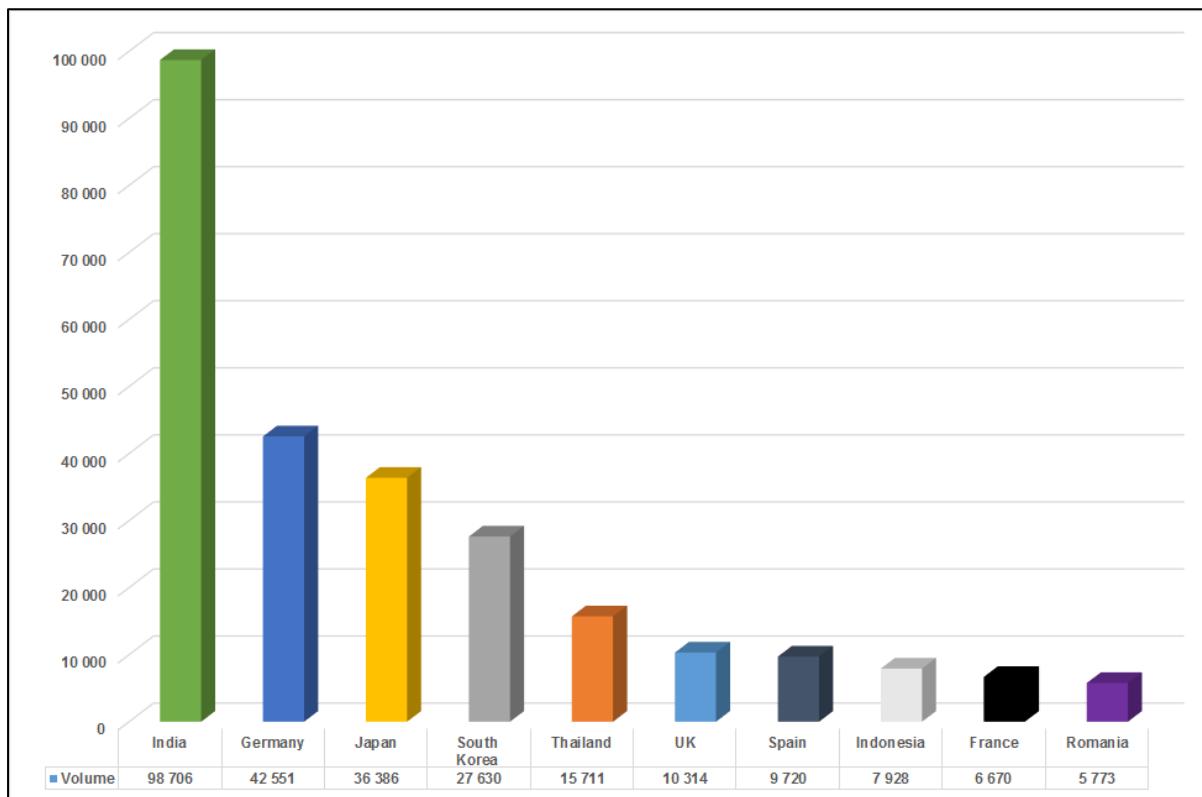

The 295 613 new vehicles (passenger cars, commercial vehicles and buses) imported into South Africa in 2018 originated from 25 countries. Imports of vehicles declined by 2 499 units, or 0,8%, to 295 613 units in 2018 from the 298 112 units in 2017, in line with the decline of 1,0% in aggregate new vehicle sales in the domestic market.

In 2018, 53,5% of all new vehicles sold in South Africa were imported. An important aspect of the South African automotive industry is the relationship between imports and domestic production as governed by the automotive policy regime in South Africa. The previous Motor Industry Development Programme (MIDP) and current Automotive Production Development Programme (APDP) encourage domestic OEMs to manufacture high volumes of selected models linked to export contracts to obtain economies of scale, coupled with low-volume models imported to complement domestic market mixes. The OEMs and independent vehicle importers can offset vehicle and original equipment component import duties through duty rebate mechanisms that have been structured to support both the competitiveness and sustainability of the domestic automotive industry.

South African consumers benefit from access to a wide variety of new models and a highly competitive pricing environment. Every brand has a benchmark product in just about every segment of the market. The domestic model mix is thus arranged to provide the most effective marketing combination of domestically manufactured and imported models to satisfy a consumer-driven market.

India, with 98 706 units and accounting for 33,4% of the total vehicles imported, was the top country of origin in volume terms for passenger cars and commercial vehicles imported into South Africa in 2018. India's profile is suited to produce small vehicles, which dominate its large domestic market, and global OEMs have therefore recognised India's capabilities in this product range by allocating their global production of small vehicles to the country. Most of the vehicles imported from India into the domestic market were therefore entry-level or small vehicles. Volkswagen's Polo Vivo was the only vehicle in these segments manufactured in the country in 2018.

Top automotive countries of origin for vehicles – 2018 volumes

Source: AIEC, SARS

Although the volume leader with respect to imports was India, the value of Indian imports was less than half of those imported from Germany, which included the premium brands such as Audi, BMW, Mercedes-Benz and Porsche. The following table reveals that in volume terms, India, followed by Germany, Japan and South Korea were the top countries of origin for vehicles imported into South Africa in 2018.

AUTOMOTIVE PARTS AND COMPONENTS – IMPORTS

Original equipment component imports by the OEMs amounted to R97,8 billion in 2018, up by 9,2% from the R89,6 billion in 2017. The increase is in line with new model launches and higher year-on-year vehicle production volumes supported by record vehicle exports in 2018. Global sourcing principles apply in the vehicle manufacturing industry, and original equipment components are components or systems supplied directly to the national or international OEMs and have global recognisable brands. High value, capital-intensive componentry, such as the powertrain and telematics, which collectively account for about 50% to 60% of the value in a modern vehicle, are mainly imported into South Africa and the remainder sourced in the domestic market.

Top countries of origin for imported original equipment components – 2018

Source: AIEC, SARS

After local value-adding processes, completely built-up vehicles are then exported or sold in the domestic market. The development and deepening of the South African component-supplier base under the APDP is an important focal point, as it will reduce

the risks associated with exchange rate fluctuations and logistics costs. Higher volumes relating to the expansion of vehicle production in the country under the South Africa Automotive Masterplan 2021-2035 of up to 1,4 million vehicles per annum by 2035, as well as various supplier competitiveness initiatives and localisation efforts, could improve the viability of further foreign direct investment and export contracts in future. The following table reveals that imports of original equipment components in 2018 originated mainly from Germany, Thailand and Japan.

Top 10 countries of origin for original equipment components imported (Chapter 98) – 2014 to 2018

Country	2014	2015	2016	2017	2018

The independent aftermarket is responsible for the manufacture and sale of automotive replacement parts and accessories through independent retailers and repair shops directly to the consumer rather than to the OEMs themselves. The aftermarket also re-manufactures, distributes, retails and installs motor vehicle parts and products, other than the original equipment components.

In 2018, imported passenger cars accounted for 72,6% of the total passenger car market in South Africa, as a brand conscious, consumer-driven market prompted the widest choice of new passenger cars to market-size ratio in the world. The growing variety of models and ever more complex technologies have therefore led to an increasing number of aftermarket parts in the market. The growth of cheaper products,

imported mainly from China, has exacerbated this trend. In 2018, the import of replacement parts increased by R2,3 billion, or 3,9%, to R61,3 billion, from the R59,0 billion in 2017.

Top 10 imported replacement parts - 2018

Source: AIEC, SARS

The following table reveals the import of aftermarket parts to complement the parts not manufactured in the domestic market, and more particularly, to service the increasing imported share of the vehicle parc of 12,46 million vehicles in 2018 for which most parts have to be imported.

Top 10 replacement parts imported (R million) – 2014 to 2018

IMPORTS BY COUNTRY OF ORIGIN

Total automotive imports (including vehicles, OE components and aftermarket parts), amounted to R219,1 billion in 2018, up R10,7 billion, or 5,1%, compared to the R208,4 billion in 2017. Imports of automotive products into South Africa remain a function of the success of the APDP, domestic market demand, and currency movements. Under the APDP, the level of imports remains a function of the success of the programme, as the benefits can only be used to rebate the import duties on vehicles and eligible automotive components that are imported. To offer imported cars at favourable prices, OEMs require the most favourable import duties. South African manufactured vehicles are not necessarily for domestic sales, but to generate import credits so that the imported vehicles demanded by the market or original equipment components to accommodate production of the domestically manufactured vehicles could be offered at more favourable prices by rebating the relevant import duties. Imports of vehicles and original equipment components as well as replacement parts for the growing vehicle parc of 12,46 million vehicles at the end of 2018, remained high.

South Africa's main automotive countries of origin – 2018

Source: AIEC, SARS

The countries of origin for vehicles and automotive components imported into South Africa generally reflect the global linkages with the head offices of parent companies. The notable exception amongst the top countries of origin in 2018 was China, where most of the imports were for aftermarket parts. The following table reveals the import values and rankings for the 65 countries of origin for vehicles and automotive component imports into South Africa, above the R10 million threshold, for 2014 to 2018. Countries for which the import values **more than doubled** from 2014 to 2018 have been highlighted in yellow in the following table.

Import value and ranking by country of origin – 2014 to 2018

ALL AUTOMOTIVE PRODUCTS – IMPORTS BY COUNTRY OF ORIGIN

The following tables reveal total automotive import details for the 65 countries of origin recording an import value above R10 million of the total automotive import value of R219,1 billion in 2018. Please note that “other parts” refer to various miscellaneous parts and sub-components eligible in terms of the APDP but not classifiable under one of the main automotive component categories. The import values of the latest year (2018) are used to rank the countries in order of priority, from the most to the least important country of origin and also for the automotive component categories, from the highest to the lowest import value for each country of origin. Countries and products for which the import values **more than doubled** from 2014 to 2018 have been highlighted in yellow in the following tables.

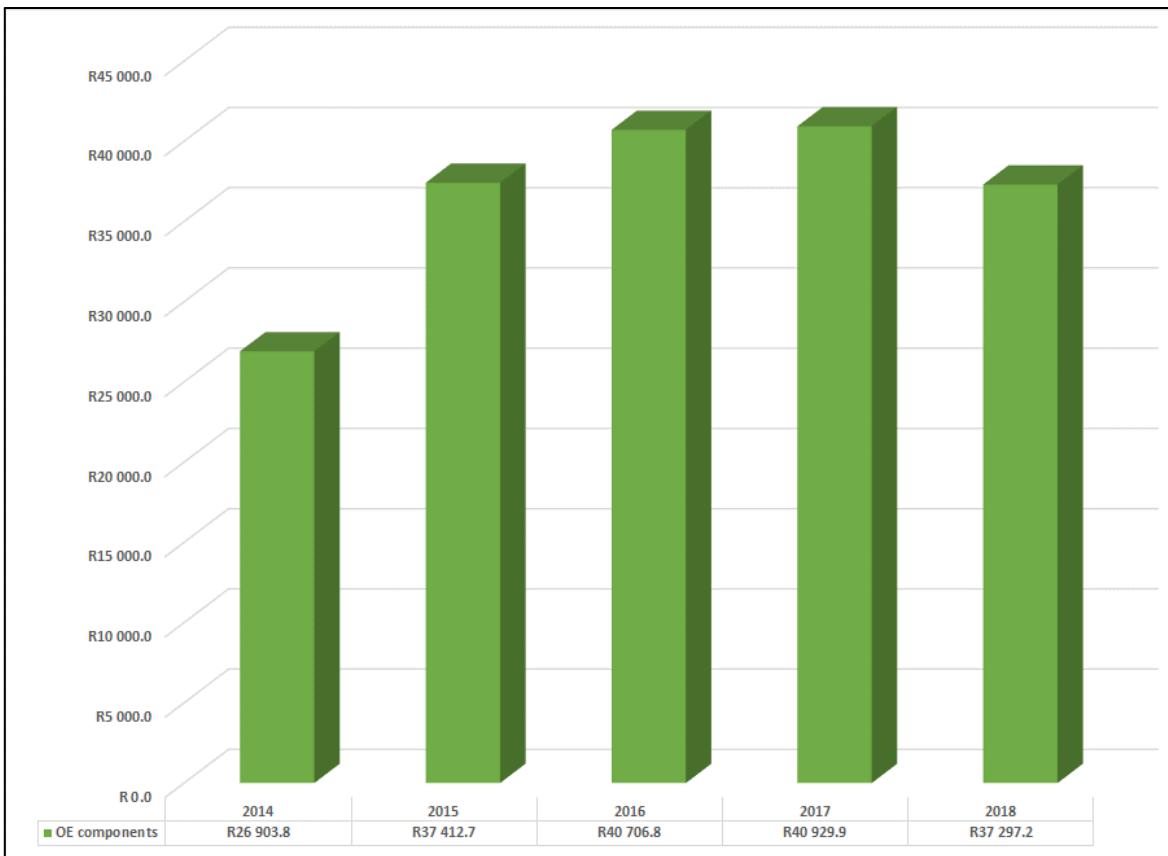

Germany: 1

Standard disclaimer

The trade data is based on eligible APDP products. The AIEC cannot vouch for the accuracy of the information obtained from the source. Due to certain limitations, Customs and Excise statistics cannot always distinguish between automotive components eligible in terms of the APDP and non-APDP components. The main purpose of this trade data is to discern trends in imports and countries of origin.

Inspiring new ways
