LOCALISATION AND EXPORT DEVELOPMENT MATRIX 2015 – 2019

In 2019, imported passenger cars accounted for 75,1% of the total passenger car market in South Africa, as a brand conscious, consumer-driven market prompted the widest choice of new passenger cars to market size ratio in the world. The growing variety of models and ever more complex technologies have therefore led to an increasing number of aftermarket parts in the market. Imports of original equipment components as well as replacement parts for the growing vehicle parc of 12,70 million vehicles at the end of 2019, remained high. Considering that the South African car parc is an aging one with 80% of cars out of warranty and 60% of cars being six years or older, servicing of these older vehicles becomes critical. The aim of the localisation and export development matrix 2015 – 2019 is to provide a detailed analysis of the growth in replacement parts imports over a five-year period in order to identify potential localisation opportunities, which could result in potential export opportunities for the domestic automotive industry in future.

STRUCTURE OF TOTAL SOUTH AFRICAN EXPORTS AND IMPORTS

The pattern of South Africa's foreign trade has changed dramatically in recent years. South Africa's established trade relations with the Eurozone and North America remain important as they are long-standing relationships. However, in recent years, trade ties with Africa and Asia have strengthened. This is clearly evident in South Africa's countries of origin for its import requirements. Asia is now the country's largest trading bloc by far and accounted for R406 billion, or 31,3%, of total South African exports of R1 297,3 billion in 2019 and R572,9 billion, or 45,0%, of total South African imports of R1 273,3 billion in 2019. South Africa retained a huge trade surplus with the African continent in 2019 while the balance of trade with other major regions remained in deficit.

South Africa's trade balance – 2019 (R billion)

World Region	Exports	Imports	Trade surplus / (deficit)
Africa	346.3	152.4	193.9
Europe	339.8	400.3	(60.5)
America	111.3	126.4	(15.1)
ASIA	406.0	572.9	(166.9)
OCEANIA	12.8	17.0	(4.2)
Other unclassified	72.6	4.3	68.3
Ship/Aircraft	8.5	-	8.5
Total	1 297.3	1 273.3	24.0

Source: SARS

The size of the following circles represents the countries' contribution to total South African imports and the colour of the circles represent the world region groups. China remained South Africa's biggest country trade partner in 2019, with imports amounting to R235,1 billion, or 18,5% of total imports of R1 273,3 billion, followed by Germany (9,9%), the US (6,6%), India (4,9%), Saudi Arabia (4,2%), and the UK (3,3%).

Top South African countries of origin for imports – 2019

Source: SARS

AUTOMOTIVE INDUSTRY TRADE BALANCE

South Africa's top automotive regional trading partner in 2019 remained the European Union (EU). Vehicle and automotive component exports to the EU increased by R24,5 billion, or 23,3%, from R105,2 billion in 2018 to R129,7 billion in 2019, mainly driven by increasing vehicle exports to the region. The following table reveals that the EU and Africa were the two regions providing a trade surplus in 2019. The largest deficit was recorded with the 48-country Asia region, including countries such as China, Japan, India and Thailand.

South Africa's main automotive regional trade partners

Year	Imports into SA (R billion)	Exports from SA (R billion)	Trade surplus/ (deficit) (R billion)
2019 Total	233.7	201.7	(32.0)
EU	119.2	129.7	10.5
NAFTA	16.1	12.1	(4.0)
Africa (incl. SADC)	2.2	31.9	29.7
Mercosur	5.1	1.3	(3.8)
ASIA	89.0	20.7	(68.3)
Other regions	2.1	6.0	3.9

Source: AIEC, SARS

There are certain eligibility requirements under the APDP, to ensure that the beneficiaries are companies producing substantial quantities of components for vehicle manufacturing, and to exclude accessories. The imported replacement parts, not linked to value-addition in the country under the APDP, with the exception of automotive tooling, amounted to R62,9 billion in 2019, reflecting an increase of 2,6%, compared to the R61,3 billion imported in 2018. The import value of aftermarket parts from China, in particular, reflected substantial growth over recent years. The trade deficit in 2019 declined to R32,0 billion, compared to the R40,3 billion in 2018, and narrowed substantially from its peak of R63,8 billion in 2013, to reflect a significant reduction in real terms over recent years.

IMPORTS OF VEHICLES

South African new vehicle demand is met by a range of imported and domestically manufactured vehicles. In 2019, the 290 624 new light vehicles (passenger cars and light commercial vehicles) imported into South Africa originated from 25 countries. Imports of light vehicles declined by 1 573 units, or 0,5%, from the 292 197 units in 2018 to 290 624 units in 2019, in line with the decline of 2,8% in aggregate new vehicle sales in the domestic market. Light vehicle imports increased to 57,1% of the total light vehicle sales in 2019, up from the 55,7% in 2018, as domestic light vehicle sales declined proportionally more than the decline in vehicle imports.

In order to offer imported vehicles at favourable prices, OEMs require the most favourable import duties. Vehicles manufactured in South Africa are not necessarily destined for sale in the domestic market, but are destined to generate import credits so that the imported vehicles and growing choices demanded by a consumer-driven market can be offered at more favourable prices by rebating the relevant import duties. The growth in variety of vehicles in South Africa is therefore a direct result of government's automotive policy programme whereby manufacturers earn duty credits with which they can cost-effectively import other vehicles. In 2019, passenger car imports comprised 75,1% and light commercial vehicle imports 15,6% of total light vehicles sold in South. Significant rationalisation of vehicle models manufactured in South Africa has taken place over recent years, as the policy regime encourages domestic OEMs to manufacture high volumes of selected models linked to export contracts to obtain economies of scale, coupled with low-volume models imported to complement domestic market mixes. South African consumers therefore benefit from access to a wide variety of new models and a highly competitive pricing environment in which vehicle price inflation has remained below the CPI over the past two years.

The top country of origin, in volume terms, for passenger cars and LCVs imported into South Africa in 2019 was India, with 106 199 vehicles, accounting for 36,5% of the total light vehicles imported. As a production hub for entry-level and small vehicles, most of the vehicles imported from India fell in these categories. Volkswagen's Polo Vivo was the only vehicle in these segments manufactured in South Africa in 2019. The following table reveals that in volume terms, India, followed by Germany, Japan and South Korea were the top countries of origin for vehicles imported into South Africa in 2019. In import Rand value terms, Germany, of which imports included the premium brands such as Audi, BMW, Mercedes-Benz and Porsche, was the main country of origin in 2019.

Top countries of origin for light vehicles (passenger cars and light commercial vehicles) imported – 2015 to 2019

Country of origin	2015	2016	2017	2018	2019	2019

Countries for which the import values **more than doubled** from 2015 to 2019 have been highlighted in **yellow**.

AUTOMOTIVE PARTS AND COMPONENTS – IMPORTS

Original equipment (OE) component imports by the seven OEMs in South Africa increased to R106,8 billion in 2019, up by R9,0 billion, or 9,2%, from the R97,8 billion in 2018, in line with the industry's record vehicle production volume, supported by the record vehicle export volume in 2019. OE components are components or systems supplied directly to national or international OEMs and have global recognisable brands. In this regard, global sourcing principles apply in the vehicle manufacturing industry and in those instances where the OE components are not manufactured in South Africa, the components are imported. High value, capital-intensive componentry, such as the powertrain and telematics, which collectively account for about 50% to 60% of the value in a modern vehicle, are mainly imported into South Africa and the remainder sourced in the domestic market. The widening and deepening of the country's component-supplier base under the SAAM is an important focal point, as it will reduce the risks associated with exchange rate fluctuations and logistics costs.

The following table reveals that imports of original equipment components originated mainly from major vehicle production countries such as Germany, Thailand, Japan, the US and China.

Top 10 countries of origin for original equipment components imported (Chapter 98) – 2015 to 2019

Country	2015	2016	2017	2018	2019
Total (R billion)	79.6	88.0	89.6	97.8	106.8

Source: AIEC, SARS

The independent aftermarket is responsible for the manufacture and sale of automotive replacement parts and accessories through independent retailers and repair shops directly to the consumer, rather than to the OEMs themselves. The aftermarket also re-manufactures,

distributes, retails and installs motor vehicle parts and products, other than the original equipment components. In 2019, the import of replacement parts increased by R1,6 billion, or 2,6%, to R62,9 billion, up from the R61,3 billion in 2018. The following table reveals the top replacement parts imported to complement the parts not manufactured in the domestic market for 2015 to 2019.

Top replacement parts imported (R million) – 2015 to 2019

World: Automotive Goods	2015	2016	2017	2018	2019	Ranking	% of total export value

The countries of origin for the aftermarket parts imported, with the exception of China, were aligned with the main countries of origin for passenger cars and commercial vehicles. Imports from the traditional markets such as Germany, the US, Japan, and the UK have declined over recent years, while imports from China have increased, indicating the influence and cost competitiveness of this dominant automotive powerhouse.

Top countries of origin for imported replacement parts – 2019

Source: AIEC, SARS

In 2019, imported passenger cars and light commercial vehicles accounted for 57,1% of the total passenger car and light commercial vehicle market in South Africa. A brand conscious, consumer-driven domestic market prompted the widest choice of new passenger cars to market-size ratio in the world. Considering that consumers keep their cars for longer due to the current weak macro-economic climate in the country, the growing variety of models in the market, as well as the ever more complex technologies in vehicles, has led to increases in the number of aftermarket parts in the market. The growth of cheaper parts from China, to service the increasing imported share of the vehicle parc of 12,70 million vehicles in 2019, for which most parts have to be imported, has exacerbated this trend.

The following table reveals the top 10 countries of origin for imported replacement parts from 2015 to 2019.

Top 10 countries of origin for imported replacement parts – 2015 to 2019

Country of origin	2015	2016	2017	2018	2019
China	16.8%	16.8%	18.2%	19.6%	19.7%
Germany	18.8%	20.0%	19.5%	16.8%	16.7%
USA	9.4%	9.5%	9.2%	10.8%	9.8%
Japan	7.3%	5.9%	5.6%	5.9%	5.4%

Other	29.4%	29.9%	28.9%	29.2%	29.5%

Source: AIEC, SARS

The countries of origin for the aftermarket parts imported, with the exception of China which moved to the top country of origin in 2018, were aligned with the main countries of origin for new passenger cars and commercial vehicles.

IMPORTS BY COUNTRY OF ORIGIN

Imports of automotive products into South Africa remain a function of the success of the APDP, domestic market demand, and currency movements. Under the APDP, the level of imports remains a function of the success of the programme, as the benefits can only be used to rebate the import duties on vehicles and eligible automotive components that are imported. Imports of vehicles and original equipment components, as well as replacement parts for the growing vehicle parc of 12,70 million vehicles at the end of 2019, remained high.

For the domestic automotive industry, the Rand exchange rate is particularly important with regard to the exchange rates of the source countries for South African imports. At an individual company level, depending on the particular firm's balance of trade, the impact of exchange rate fluctuations may vary. Against the US dollar, the Rand depreciated by 9,2% on an annual average basis in 2019, against the Euro by 3,7%, against the Pound by 4,6%, against the Chinese Yuan by 4,7%, and against the Yen by 10,7%.

South Africa's top automotive countries of origin – 2019

Source: AIEC, SARS

The following table reveals the import values and rankings for the 65 countries of origin for vehicles and automotive component imports into South Africa, above the R10 million threshold, for 2015 to 2019. From 2018 to 2019, the import values of Austria and Latvia more than doubled on a year-on-year basis.

Import value and ranking by country of origin – 2015 to 2019

Countries for which the import values **more than doubled** from 2015 to 2019 have been highlighted in **yellow**.

ALL AUTOMOTIVE PRODUCTS – IMPORTS BY COUNTRY

The following tables reveal total automotive import details for the 65 countries of origin recording an import value above R10 million of the total automotive import value of R233,7 billion in 2019. Please note that “other parts” refer to various miscellaneous parts and sub-components eligible in terms of the APDP but not classifiable under one of the main automotive component categories. The import values of the latest year (2019) are used to rank the countries in order of priority, from the most to the least important country of origin and also for the automotive component categories, from the highest to the lowest import value for each country of origin. Relative high-volume light and heavy commercial vehicle imports of vehicles have also been included in order to identify potential localisation opportunities for replacement parts imports from the respective countries. Countries and products for which the import values more than doubled from 2015 to 2019 have been highlighted in **yellow** in the following tables.

1. GERMANY (left-hand drive)
(Vehicle production 2019 – 4 661 328 units) (Vehicle sales 2019 – 4 017 059 units)

Germany: 1	2015	2016	2017	2018	2019
